kinase;

AMPK

gamma

ω gene;

gamma

Homo sapiens human.

RESULT : HSA249977 LOCUS DEFINITION

Homo gapiens mRNA for AMP-activated (AMPK gamma 3 gene).

mRNA protein

kinase

PRI 07-APR-2000 gamma 3 subunit

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           NOTE: This is a 'working draft' sequence. It currently consists of 17 contigs. The true order of the pieces is not known and their order in this sequence record is
                                                                        28888
